

Citizen Portal — Database Flow Guide

Housing For All (MMSAY) | .NET se migrate hua data | Personal reference document
Example: Vinod Kumar Sroha | Mobile: 9812489207 | Application: HR-MMSAY-2024-105751 | Flat/Asset: 147462

1. Suru kahan se karein?

Sabse pehle **user identify** karo. Baaki sab tables isi se link hoti hain.

Step	Table	Kya search karein	Kya milega
0	users	mobile = 9812489207	Login user (id, name, mobile)

```
SELECT id, name, mobile FROM users WHERE mobile = '9812489207';
```

2. Applicant / Purchaser record

STEP 1 Mobile se purchaser table mein jao — yeh **main applicant table** hai.

Table	Search column	Example value	Milta kya hai
property_private_purchasers	MobileNo	9812489207	Naam, Father, Family ID, Member ID, Application No, Flat_Id, SectorId, CityId, DistrictId

```
SELECT PrivatePurchaserId, Flat_Id, PrivatePurchaserName, PurchaserFatherName,
       MobileNo, ApplicationNo, PPPIId, MemberID, CasteCategoryName,
       SectorId, CityId, DistrictId, BranchId, Address, CreateDate
FROM property_private_purchasers
WHERE MobileNo = 9812489207;
```

Vinod ka record (example)

Column	Value	Matlab
PrivatePurchaserId	164926	Applicant ki unique ID — auction table mein PurchaserID
Flat_Id	147462	Property ID — doosri tables mein AssetId ke naam se
ApplicationNo	105751	Application number
PPPIId	9QRU7717	Family ID
MemberID	AABE7231	Member ID
SectorId	686	Ward/Sector link → sectors table
CityId	3252	City link → cities table
DistrictId	291	District link → districts table
BranchId	3205	EM Office link → em_offices table

Important: Flat_Id (purchasers) = AssetId (property tables). Same number, alag column naam (.NET legacy).

3. Property allotted hai ya nahi?

STEP 2 Purchaser ID ya Flat_Id / AssetId se auction table check karo.

Table	Search column	Search value	Milta kya hai
property_auction_detail	PurchaserID	164926	Allotment, FlatCost, ReceivedAmount, BalanceAmount, AssetId
property_auction_detail	AssetId	147462	Same record — property side se search

```
SELECT PropertyAuctionId, AssetId, FlatCost, ReceivedAmount, BalanceAmount,
       PurchaserID, SectorId, CityId, DistrictId, BranchId
FROM property_auction_detail
WHERE AssetId = 147462 AND IsActive = 1 AND IsDeleted = 0;
```

Vinod ka auction record

Column	Value
PropertyAuctionId	365393
AssetId	147462
PurchaserID	164926
FlatCost	₹ 1,00,000
ReceivedAmount	₹ 20,000
BalanceAmount	₹ 80,000
DistrictId / CityId / SectorId	291 / 3252 / 686

4. Property ki detail (flat/plot naam, size)

STEP 3

AssetId se property registration table.

Table	Search column	Search value	Milta kya hai
property_registration	AssetId	147462	AssetName, Size, Unit, SectorId, CityId, DistrictId

```
SELECT AssetId, AssetName, AssetSize, Unit, SectorId, CityId, DistrictId, BranchId
FROM property_registration
WHERE AssetId = 147462;
```

Vinod ki property

Column	Value
AssetName	RW27.28.26PII_E-1578
AssetSize	30 Sq. Yards
SectorId	686
CityId	3252
DistrictId	291

5. City, District, Sector/Ward — NAAM kahan se?

STEP 4

IDs sirf number hain. Naam master tables se aate hain.

ID mila kahan se	ID value	Naam kis table mein	Search query	Result (Vinod)
DistrictId	291	districts	WHERE DistrictId = 291	ROHTAK
CityId	3252	cities	WHERE CityId = 3252	ROHTAK MC
SectorId	686	sectors	WHERE SectorId = 686	Ward 6
BranchId	3205	em_offices	WHERE BranchId = 3205	ROHTAK

```
-- District
SELECT DistrictName FROM districts WHERE DistrictId = 291;

-- City
SELECT CityName FROM cities WHERE CityId = 3252;

-- Sector / Ward
SELECT SectorName FROM sectors WHERE SectorId = 686;

-- EM Office
SELECT BranchName FROM em_offices WHERE BranchId = 3205;
```

```
-- Ek saath JOIN se sab naam
SELECT pad.AssetId, d.DistrictName, c.CityName, s.SectorName, eo.BranchName
FROM property_auction_detail pad
LEFT JOIN districts d ON pad.DistrictId = d.DistrictId
LEFT JOIN cities c ON pad.CityId = c.CityId
LEFT JOIN sectors s ON pad.SectorId = s.SectorId
LEFT JOIN em_offices eo ON pad.BranchId = eo.BranchId
WHERE pad.AssetId = 147462;
```

Ward vs Sector: Alag ward table NAHI hai. Sirf **sectors** table hai. SectorName mein kabhi "Ward 6", kabhi "Sector 28", kabhi gaon ka naam (Malerna) hota hai. Ward hai ya Sector — SectorName padh kar pata chalta hai.

6. Payment & Installment tables

STEP 5

AssetId = 147462 se payment data.

Table	Search column	Kya milta hai
installment_due	AssetId = 147462	EMI schedule, DueDate, OfferOfPossessionDate (Purchase Date)
ledger	AssetId = 147462	Installment paid/pending status
cash_receipt_details	asset_number = 147462	Payment receipts, receipt date

Purchase Date: property_auction_detail.CreatedDate mostly empty hai (.NET export). Use karo:
installment_due.OfferOfPossessionDate → fallback: property_private_purchasers.CreateDate

7. Poora flow — ek diagram

users (mobile: 9812489207) ? ? property_private_purchasers ??? PrivatePurchaserId = 164926 ???????????
property_auction_detail.PurchaserID ??? Flat_Id = 147462 ????????????????????? AssetId (sab property tables) ???
ApplicationNo = 105751 ??? PPPId = Family ID | MemberID = Member ID ??? SectorId = 686 ??? sectors ??? "Ward 6" ???
CityId = 3252 ??? cities ??? "ROHTAK MC" ??? DistrictId = 291 ??? districts ??? "ROHTAK" property_auction_detail (AssetId
= 147462) ??? FlatCost, ReceivedAmount, BalanceAmount ??? DistrictId, CityId, SectorId (same IDs ? same naam tables)
property_registration (AssetId = 147462) ??? AssetName = RW27.28.26PII-E-1578, Size, Unit installment_due / ledger /
cash_receipt_details ??? AssetId ya asset_number = 147462

8. ID Search Cheat Sheet

Agar ye ID ho	Kis table mein search	Column name
9812489207 (mobile)	users	mobile
9812489207 (mobile)	property_private_purchasers	MobileNo
164926	property_private_purchasers	PrivatePurchaserId
164926	property_auction_detail	PurchaserID
147462	property_private_purchasers	Flat_Id
147462	property_registration	AssetId
147462	property_auction_detail	AssetId
147462	installment_due	AssetId
147462	ledger	AssetId
147462	cash_receipt_details	asset_number
291	districts	DistrictId
3252	cities	CityId
686	sectors	SectorId
3205	em_offices	BranchId

9. Dashboard par kya kahan se aata hai

Screen field	Source table	Column
Name	property_private_purchasers / users	PrivatePurchaserName
Father Name	property_private_purchasers	PurchaserFatherName
Family ID	property_private_purchasers	PPPId
Member ID	property_private_purchasers	MemberID
Application ID	property_private_purchasers	ApplicationNo + year
Allotted Asset	property_registration	AssetName

Total Amount	property_auction_detail	FlatCost
Total Paid	property_auction_detail + installment_due + ledger	ReceivedAmount + EMIs
Purchase Date	installment_due	OfferOfPossessionDate
District	districts	DistrictName (via DistrictId)
City	cities	CityName (via CityId)
Ward / Sector	sectors	SectorName (via SectorId)
